

FACIAL INJECTABLES MASTERCLASS

LIVE PATIENT ASSESSMENT AND INJECTIONS

Morning Session 0800 to 1230

INSTRUCTORS

Dr Steve Fagien (Oculoplastic Surgeon, USA)

Dr Steven Liew (Plastic Surgeon, AUS)

Dr Arthur Swift (Plastic Surgeon, CANADA)

0800-0830

INTRODUCTION AND PT ASSESSMENT SESSION

Lecture : Botox and Filler from walking to flying S Liew 5 min

Patient Assessment and Treatment Plan S Liew 20 min

0830-0945

UPPER THIRD OF FACE

Lecture : Optimisation the nonsurgical rejuvenation of the upper third
S Fagien 5 mins

Injecting session : Moderator Dr S Liew

Filler to temple (superficial plane) A Swift 15 min

Filler to temple (deep plane) S Fagien 15 min

Eye Brow reshaping and liftng A Swift 15 min

Eye Brow reshaping and liftng S Fagien 15 min

DEMONSTRATORS :

Dr Peter Callan (Plastic Surgeon , Victoria)
Dr Dan Kennedy (Plastic Surgeon, Queensland)
Dr Mark magnusson (Plastic Surgeon, Queensland)
Dr Ian Holten (Plastic Surgeon, Victoria)

0800-0825

Delegates to change into anatomy lab gown and debrief on regulations in the anatomy lab

0830

Delegates to enter the lab

0830-0915**Part 1 : 45 min**

Outlining the anatomy on the predissected specimen by Dr Peter Callan

Delegates to view via monitors

1. Forehead anatomy : Intimate relationship between frontalis and corrugator supercilii and procerus
2. Layers in temporal fossa : structures in superficial temporoal fascia (STF) : STA, STV and frontal branch of facial nerves . Deep temporoal fascia (DTF) and temporalis muscle.
3. Layers on nasal dorsum where filler is normally being placed preperiosteal layer. +/- structures within columella
4. Tear-trough anatomy: outlining the location of TT and orbicularis retaining ligament (ORL) and its importance in its separation of prezygomatic space from the orbit
5. Intimate relationship between DAO and DLI

0915-1030**Part 2: 1 hr 15 min**

Break into 3 groups (10 each with each demonstrator)

1. Detail demonstration of the above with filler injection into temple (superficial layer and deep layer) and dissection of anatomy.
2. Stained “ Botox” injection to corrugator and dissection of layers of glabella, showcasing frontalis, corrugator and procerus.

1030-1045 TEA BREAK

1045-1230

Part 3: 1 hr 45 min

3. Injection of filler to TT. Dissection of TT and infraorbital rim , showcasing exact location of filler and ORL
4. Filler to nose and dissection
- 5 Dissection of midface with demonstration of ION, facial artery.
6. Dissection of lower lip, shwing the closed proximity of DAO and DLI
7. Demonstration of risorius and masseter muscle
